## **Ener-Core to Present at Several Prestigious Energy and Environmental Industry Conferences in June**

IRVINE, Calif.-- Ener-Core, Inc. (OTCQB: ENCR), the world's only provider of *Power Oxidation* technology and equipment that generates clean power from low-quality and waste gases from a wide variety of industries, has been invited to present at multiple prestigious industry conferences in the coming weeks.

"We've had an exceptional start to the year with several new customers, successful progress in scaling up of the size our Power Oxidizer, entry into a new industry (ethanol/alcohol distilleries), and the kick-off of our international joint sales efforts with our licensee partner, Dresser-Rand," said Ener-Core's CEO, Alain Castro. "Our key target markets have clearly taken note of our progress, and we're now receiving many opportunities to tell our story to potential customers thanks to that momentum. We're thrilled to have an opportunity to speak publicly at these reputable industry conferences so we can continue to inform the companies within these industries on how Ener-Core can enable them to profitably utilize their waste gas emissions to generate clean power for their facilities."

Ener-Core executives will present or speak at the following conferences:

### **[International Fuel Ethanol Workshop & Expo](#), Minneapolis, MN**

*(largest and longest-running ethanol conference in the world)*

*Wednesday, June 3 at 8:30am:*

CEO Alain Castro will speak on a panel discussing how ethanol plants can gain a competitive edge by significantly reducing their operating costs by converting their waste gas emissions into on-site energy.

### **[Waste Expo](#), Las Vegas, NV**

*Wednesday, June 3 at 3:00pm:*

Market Development Manager Michael Leone will be speaking on a panel discussing the successes and challenges of utilizing methane gas generated from closed landfill sites. Michael will present case studies for Ener-Core's Attero and Santiago Canyon closed landfill projects.

### **[Energy Management Congress](#), Long Beach, CA**

*Thursday, June 4 at 2:00pm:*

Market Development Manager Michael Leone and Broad USA's Douglas Davis will be jointly presenting on free cooling applications. The Presentation will specifically focus on utilizing waste heat generated by the 2MW KG2-3GEF/PO Powerstation for combined cooling, heating and power applications.

### **Power-Gen Europe, Amsterdam, The Netherlands**

*(largest and most prestigious power equipment event in Europe)*

*Thursday, June 11 at 9:00am:*

CEO Alain Castro, along with a key executive from Attero, Ener-Core's first customer in Europe, will jointly be presenting a paper on how Attero has managed to continue generating renewable energy from a landfill for many years after the landfill was closed.

### **About Ener-Core**

Irvine, California-based Ener-Core, Inc. ([ENCR](#)) designs, manufactures and has commercially deployed unique systems that generate base load, clean power from polluting waste gases including methane. Ener-Core's patented Power Oxidizer is the only solution of its kind that turns one of the most potent pollution sources into a profitable, "always on" source of clean energy. Ener-Core's technology offers a revolutionary alternative to the flaring (burning) of gaseous pollution while generating operating efficiencies and ensuring compliance with costly environmental regulations.

Ener-Core offers a variety of platforms including the 250kW Ener-Core Powerstation EC250 ("EC250"), the Ener-Core Power Oxidizer 333 KW Powerstation ("EC333") and the larger counterpart, the 2MW Ener-Core Powerstation KG2-3GEF/PO.

### **Cautionary Statement Regarding Forward-Looking Statements**

Forward-looking statements contained in this press release are made under the Safe Harbor Provision of the Private Securities Litigation Reform Act of 1995. Information provided by Ener-Core, Inc., such as online or printed documents, publications or information available via its website may contain forward-looking statements that involve risks, uncertainties, assumptions, and other factors, which, if they do not materialize or prove correct, could cause its results to differ materially from historical results, or those expressed or implied by such forward-looking statements. All statements, other than statements of historical fact, are statements that could be deemed forward-looking statements, including statements containing the words "planned," "expects," "believes," "strategy," "opportunity," "anticipates," and similar words. These statements may include, among others, plans, strategies, and objectives of management for future operations; any statements regarding proposed new products, services, or developments; any statements regarding future economic conditions or performance; statements of belief; and any statements of assumptions underlying any of the foregoing. The information contained in this release is as of the date of this press release. Except as otherwise expressly referenced herein, Ener-Core assumes no obligation to update forward-looking statements.
